Charlotte Durkin, Head of Programme, Medical Research Council, UK

Presentation title: UK Regenerative Medicine Landscape

Charlotte is the Head of Programme for the Molecular and Cellular Medicine Board at UK Research and Innovation's Medical Research Council (MRC), looking after the peer review process and funding decisions in this research area. Charlotte is also the lead for regenerative medicine and multimodal, multiscale research activities at MRC. Charlotte has a PhD in cell biology from Cancer Research UK's London Research Institute (now part of the Francis Crick Institute) and undertook research focused on understanding host-pathogen interactions during her post-doctoral research at Imperial College London, before joining MRC.
