Stuart Forbes, Director of the UKRMP Engineered Cell Environment Hub and Professor of Transplantation and Regenerative Medicine at the University of Edinburgh

Presentation title: UK Regenerative Medicine: Engineering the Cell Environment

Stuart Forbes is Professor of Transplantation and Regenerative Medicine, at the University of Edinburgh. His research focuses on how the chronically damaged liver regenerates and how these mechanisms become deranged in liver and bile duct cancer. He is Director of the Institute for Regeneration and Repair and the Centre for Regenerative Medicine at The University of Edinburgh and the UKRMP Engineered Cell Environment Hub. Stuart is a consultant Hepatologist at the Scottish Liver Transplant Unit and has clinical interests in liver failure, cancer and liver transplantation.
