Impact Awards: ELSI Stream - Program Guidelines

SCN will provide up to \$200,000 to support the knowledge translation of regenerative medicine research for targeted stakeholders and/or users.

Timeline:

- Letter of Intent submissions open on Thursday, September 1, 2022.
- Letter of Intent submission deadline is Thursday, September 22, 2022, at 11:59 p.m. Pacific.
- Full application submission will be opened to eligible LOI submitters on Tuesday, September 27, 2022.
- Full application submission deadline is Thursday, December 1, 2022, at 5:00 p.m. ET (2:00 p.m. PT)

The Letter of Intent and full application must be submitted using the ProposalCentral online submission platform.

Upon successful submission of an LOI and/or full application, a confirmation message will appear on the screen within ProposalCentral and a confirmation email from pcsupport@altum.com will be sent to the applicant. Add pcsupport@altum.com to the safe senders list to ensure receipt of submission confirmation.

If a confirmation email is NOT received from ProposalCentral within 48 hours of submission it is the responsibility of the lead applicant to contact SCN and ensure that the application package has been received by SCN.

About the Stem Cell Network:

Formed more than 20 years ago, the Stem Cell Network (SCN) is a national non-profit that supports stem cell and regenerative medicine research, training the next generation of highly qualified personnel, and delivering outreach activities across Canada. SCN's goal is to advance science from the lab to the clinic for the benefit of Canadians. SCN has been supported by the Government of Canada since inception in 2001. This strategic funding, valued at \$139M, has benefitted over 200 world-class research groups and 5,000 trainees and has catalyzed more than 25 clinical trials. Powering research for better health.

The Impact Awards: ELSI Stream Program:

SCN is pleased to invite proposals under the Impact Awards: ELSI Stream Program. Funding through this program will support ELSI (Ethical, Legal and Social Implications) knowledge translation projects that focus on a social, economic, technological, regulatory, patient or ethical question or challenge that should be addressed to support knowledge advancement and/or uptake of regenerative medicine in Canada and globally. Projects can include outputs that extend beyond traditional academic research products (e.g. journal publications or reports) and may include digital, educational or cultural materials. All outputs should be tailored for stakeholders or users. Successful projects will incorporate a Highly Qualified Personnel (HQP) development program designed to build the next generation of ELSI research leaders. Where appropriate, SCN encourages ELSI research projects to include wet lab investigators on project teams. Projects can support the work of individual research groups but should include collaborators from outside of the Lead Investigator's institution to further the Network and research impact.

Impact Awards: ELSI Stream are for up to \$200,000 each for 22-months (award term is April 1, 2023 to January 31, 2025). Full applications will require a strategic plan and a budget justification that corresponds with the plan. In addition, a separate detailed budget for the

requested SCN funding is required. Partnerships with companies/industry, not-for-profit organizations, foundations, charities, research institutions/hospitals/universities, and government bodies are a valuable component of project proposals. Partnerships and leveraged funding (in-kind and/or cash) will increase the application's ranking. Principal Investigator salaries and indirect costs can be listed as in-kind institutional support (PI salaries at 10% and indirect costs at 40%). In addition, applications that include collaborations with other Canadian-based investigators and have multidisciplinary expertise will also be ranked more highly.

Specific Criteria:

- Projects can focus on a social, economic, technological, regulatory, patient or ethical question or challenge that should be addressed to support the knowledge advancement and/or uptake of regenerative medicine in Canada and globally.
- Projects may focus on outputs that go beyond traditional academic research products including digital, educational & cultural materials. Note: the creation and maintenance of databases should not represent a major component of the activities funded by this award.
- Project outputs should be tailored for end users or receptors (e.g. policy & regulatory users, patient groups, academic stakeholders, media, the general public etc.).
- Project plans should include details on how the research can be accessed or utilized by receptors such as researchers, clinicians, patient groups, policy makers or the public.
- Project plans should outline an HQP plan that brings new talent into the regenerative medicine ecosystem.

- Projects must include non-federal partnerships that provide in-kind and cash contributions.

General Requirements:

- Projects must be relevant to regenerative medicine; regenerative medicine is the branch of medicine that develops methods to regrow, repair or replace damaged or diseased cells, organs or tissues. Regenerative medicine includes the generation and use of therapeutic stem cells, tissue engineering and the production of artificial organs. *Research applications that are focused on cancer must be regenerative in nature and/or use stem cells for addressing the proposed problem.*
- Projects must demonstrate research excellence, Canadian leadership, and innovation.
- Projects must clearly describe the potential impact of the proposed research and how it will open new avenues that lead to health, economic or social benefits for Canadians.

- Projects must be in the translational space.
- Project milestones and deliverables must be realistic and reasonable based on the supporting budget.
- International collaboration is also encouraged to strengthen the research activity and potential global impact.
- Projects must include a robust Highly Qualified Personnel (HQP) training plan that integrates trainees and facilitates meaningful exposure and development across the spectrum of project disciplines.
- A knowledge mobilization plan must be submitted and describe how the research will be made accessible to knowledge users outside of academia. Please note it is expected that the [Tri-Council Open Access Policy](#) will be followed to ensure research results are made publicly accessible.
- Projects must include a description of the best practices and measures that will be adopted to ensure robust, unbiased, and reproducible results, including any laboratory/project management, data governance, good documentation practices and how sex and gender considerations are integration into the research. Note: All proposed research should be conducted in accordance with the [Tri-Agency Framework: Responsible Conduct of Research](#).
- All applications must include a plan that describes the project Equity, Diversity, and Inclusion (EDI) considerations for hiring/team composition, training, and scientific methodologies.
- Sex and Gender in Research Training: Applicants must have completed and obtained certificates for the three courses comprising the CIHR [Online Training Modules: Integrating Sex and Gender in Health Research](#).
- Research Security Training: Applicants must have attended in-person SCN's July 20, 2022 Research Day OR be familiar with the [Safeguarding Your Research](#) Portal and completed the following training courses and obtained certificates: [Introduction to Research Security](#), [Dual-Use in Life Science Research](#) and [Insider and Outsider Threats](#).
- Each Project must be distinct from any other application(s) submitted to SCN to avoid 'double dipping' across SCN's research funding programs
- An applicant is limited to act as Lead Investigator on only one LOI submission and project application per program.
- Investigators requesting funds from SCN must be based at a Tri-Council eligible institution and must themselves be eligible to receive Tri-Council funding.
- To receive funding, successful applicants must execute a standard SCN Agreement, and take on all of the associated rights and obligations. These obligations include the requirement to provide SCN office with project reports as requested, and recognition of SCN as a funder.

General information about SCN's Round 2 competition:

Regenerative medicine projects that are eligible for SCN funding centre on one or more of the following topics: 1) Developing or testing therapeutic approaches that are regenerative in nature, including cell and/or gene therapies; 2) Addressing the role and function of stem cells in a tissue or disease; 3) Using stem cells as a necessary component for the generation of functional cell types; or 4) Investigating a small molecule or biologic that acts on or is dependent on endogenous stem cells for its therapeutic effect.

SCN values the individual differences, lived experiences, expertise, and knowledge of those in the community regardless of age, ancestry, culture, physical ability, gender identity, race, religion, and sexual orientation. All applications must include a plan that describes the project Equity, Diversity, and Inclusion (EDI) considerations for hiring/team composition, training, and scientific methodologies.

All applications to SCN funding competitions are treated as new applications. If a project was submitted to a previous SCN funding round, it is at the applicant's discretion to address any issues raised in prior peer review feedback. Peer reviewers will not be provided access to prior peer review feedback for any previous version of an application.

Eligible applications will be reviewed through an expert peer review process, comprised mainly of international reviewers. Projects will then be considered for strategic fit with SCN's mandate by the [Research Management Committee](#) (RMC), and funding decisions will be taken by the Board based on RMC recommendations. Successful applicants will provide the SCN office with project reports as requested and will be regularly monitored by SCN's RMC to ensure appropriate progress is being made. More details regarding SCN's peer and strategic review process can be found [here](#).

Submission process for the Impact Awards: ELSI Stream program:

A Letter of Intent (LOI) submission is mandatory for this program. LOIs will be used to identify peer review requirements, gauge the level of interest in SCN's programs, and ensure projects fall within SCN's regenerative medicine mandate. Eligible LOIs will be invited to submit a full application on Tuesday, September 27, 2022.

LOI and full application-related questions should be addressed to Jon Draper (jdraper@stemcellnetwork.ca).
